PROFILE

I am a dedicated and hardworking bachelor's student with a keen interest in technology and software development. I enjoy learning new skills and working on practical projects, including IoT-based systems and software design. Alongside my academic journey, I am also involved in entrepreneurial activities like managing small businesses in clothing. I am eager to contribute, grow, and gain more experience in a dynamic and collaborative environment.

WORK EXPERIENCE

Classique Nepal 2023- PRESENT
Founder and Owner

- Founded and manage an online store focused on retro football jerseys.
- Handle product sourcing, pricing, and customer service.
- Manage marketing through Instagram and customer engagement.
- Built a brand presence in a niche market with focus on quality and trust.

Academic Projects 2024- 2024
IoT-Based Smart Parking System

- Designed and developed a smart parking system model using IoT sensors.
- Created a functional prototype displaying available parking slots and automatic door system.
- Built the physical structure using models for demonstration.

Inventory Management 2024 - 2024
System Project (IMS)

- Designed Data Flow Diagrams (Level 0, 1, and 2) for a purchase order management system.
- Focused on streamlining purchase, product, sales, and reporting functionalities.
- Improved understanding of system analysis and design.
