

Subject: Application for Web Developer Position

Dear Manager,

I am excited to apply for a Web developer position at Blacktech company. As a passionate computing student pursuing a BSc (Hons) in Computing at Informatics College Pokhara, I am eager to leverage my technical expertise and web developing skills in a dynamic and innovative environment.

Throughout my academic journey, I have gained hands-on experience in Java, Python and C++, working on projects such as a Furniture Store Billing System and a Store Management System using Java Swing. Additionally, as an IoT Engineer, I contributed to the Underground Water Leakage Solution project, where I worked on hardware-software integration and real-time data tracking. My proficiency in web development (HTML, CSS, JavaScript) and tools like IntelliJ IDEA, Eclipse and VS Code further equip me to contribute effectively.

With a strong foundation in web development, teamwork and problem-solving, I am eager to apply my skills and grow professionally. I am particularly excited about the opportunity to work on impactful projects and learn from experienced professionals at Blacktech company.

I would welcome the chance to discuss how my skills align with your team's needs. Thank you for your time and consideration. I look forward to your response.

Best regards,

Priyansu Shakya
