Hiring Manager

Leapfrog Technology

Kathmandu, Nepal

Dear Hiring Manager,

I am writing to express my genuine interest in the Frontend Developer position at Leapfrog Technology. As a passionate BIT student at Informatics College with a strong foundation in web technologies and a deep admiration for Leapfrog's innovative approach to software development, this role truly represents my dream job.

During my studies and personal projects, I've honed my skills in HTML, CSS, and JavaScript, and have worked on multiple group projects including an e-commerce website and an inventory management system. These experiences helped me understand the importance of user-centric design, clean code, and collaboration within a development team core values I know Leapfrog embodies.

What excites me most about Leapfrog Technology is your commitment to building world-class products and empowering your team to grow through continuous learning. I deeply admire how Leapfrog contributes to the global tech-community from right here in Kathmandu. The chance to be part of such a forward-thinking, people-first company would be a dream come true.

I am eager to bring my creativity, curiosity and dedication to your team, and to grow under the mentorship of some of Nepal's top tech talent. I'm confident that my enthusiasm and

willingness to learn would allow me to contribute positively to Leapfrog's projects and culture.

Thank you for considering my application. I would love the opportunity to discuss how I can support Leapfrog's mission and grow as a Frontend Developer within your team. Please find my resume attached. I look forward to hearing from you.

Yours sincerely

Prajwal Gurung
