

Subject: Application for web development Internship

I'm writing to apply for the Web Developer Internship at Tech Solution Company. I'm currently studying BSc (Hons) Computing at Informatics College Pokhara, and I'm really interested in using my web development skills in a real work environment.

I've worked on a couple of exciting projects during my studies. One was an IoT-Based Smart Parking System, where I used sensors and built a web interface to show real-time parking availability. I also helped build a Grocery E-Commerce Website with features like product listings and a shopping cart. Through these projects, I've become confident in using HTML, CSS, and JavaScript, and I've learned how to solve problems through coding.

I enjoy working in teams, managing my time well, and learning new things. I always try to write clean and easy-to-understand code, and I'm eager to grow as a developer.

Thank you for taking the time to read my application. I've attached my resume, and I'd love to talk more about how I can be a part of your team.

Sincerely,
Kristi Shrees
