

Subject: Application for Blue Team Ethical Hacker Role

Dear Manager,

I am writing to express my enthusiasm for the Blue Team Ethical Hacker position at CyberCX. As a passionate and driven cybersecurity student with hands-on experience in network defense and system security, I am excited about the opportunity to contribute to your organization's mission of securing Australia's digital frontier.

Currently pursuing a Bachelor of Information Technology with a specialization in Cybersecurity and Digital Forensics, I have complemented my academic learning with real-world experiences. My internship with Gridware has allowed me to assist in penetration testing, vulnerability scanning, and technical report writing—giving me firsthand exposure to threat landscapes and blue team defense mechanisms. Previously, as a System/Network Administrator at Eminence Ways, I honed my skills in system hardening, log analysis, and network configuration across Windows and Linux environments.

What excites me most about CyberCX is your commitment to innovation and your role in protecting vital infrastructure across Australia. I'm inspired by your leadership in the industry and would be honored to join a team where I can grow technically, contribute meaningfully, and be part of a culture that values continuous learning and collaboration.

I bring a strong foundation in threat detection, scripting (Python, Bash), and log forensics, alongside the ability to learn fast, adapt quickly, and stay calm under pressure. I am confident that my skills and enthusiasm will make me a valuable asset to your blue team initiatives.

Thank you for considering my application. I would be thrilled to discuss how I can support CyberCX's vision and bring value to your security operations. I look forward to the possibility of an interview.

Warm regards,

Salina Gurung
